

Water Siphons and Pumps

The Emergency Siphon

The Emergency Siphon offers an easy, efficient way to remove water from your storage barrel in the event of an emergency. The Emergency Siphon also allows you to siphon water, gasoline, and other liquids with ease. The Emergency Siphon includes a seven-foot, clear plastic siphon tube that can be extended using the optional hose adapter (sold separately). The Emergency Siphon and hose come packaged in a resealable zip-top bag for clean, compact storage anywhere you need an Emergency Siphon. To use the Emergency Siphon, simply insert into your barrel or source container and shake to start the water flowing. Go here to purchase:

Water Barrel Hand Pump

These heavy duty self venting plastic barrel pumps work by simple up and down action; and are adjustable to fit most all water barrels and Reliance water containers such as Water-Paks, Aqua-Paks, Aqua-Tainers, Jumbo-Tainers, and most other 15, 20, 30, and 55 gallon water barrels. Water pumps come complete with siphon tube to reach to the bottom of a 55 gallon water drum, but can be cut to any length desired to fit smaller water barrels and containers. Pumps deliver 8 oz. of water per stroke. **You need to purchase some 5/8-inch vinyl tubing with this pump in order to operate it and drain your water barrel completely.** I purchased this 5/8-in vinyl tubing at Home Depot. (This pump ranges in cost from \$30-34). Go here to purchase:

Automatic Ready Pump

The pump is a “Handheld Liquid Transfer System with Handheld Pump Style Handle.” This pump will automatically read and will drain or transfer liquids fast! Use this pump to transfer gas, oil and other non-corrosive auto fluids; to clear flooded areas or even to drain aquariums. This pump will pump 5-6 quarts per minute with easy push-button operation. Features are an easy to hold pump style handle alleviating spills and messy clean-ups. Transfer Oil, Gas and Water at the Touch of a Button.

This pump is great to use on a lawn mower or ATV. It works with any non-corrosive liquid. Pump style handle alleviates the chance of spills or messy clean ups. Requires, two D batteries (not included). (This pump costs around \$35). Go here to purchase:
